### Expression of Interest IT Assistance

#### Blended learning IT advice @ your centre

The Gippsland Connect project aims to meet specific needs as expressed by Learn Locals in Gippsland, and identified in the recent revitalising East Gippsland conference and report developed by Sharman Consultancy.

The need for technical advice, and support in setting up systems and processes to sustain technology integration was clearly identified as a need across the region.

The IT advice part of the project is targeted to support the further development and integration of blended online delivery through the Learn and Connect Moodle and the proposed Gippsland Learn Local TELC.

The support person will be able to provide advice and guide more strategic purchase of IT equipment to directly benefit your organisation and students in accessing technology enabled learning options.

The project has contracted an experienced educator with a wide skill set and experience in designing and delivering training that has a significant blended learning component.

If you are interested in blended learning but not sure where to start, please complete the form below asap and we will contact you to organise a visit at a time convenient to you.

Places for IT Assistance are limited and we therefore urge you to register your interest asap.
